USE OF THE INDEX

Original contributions to the JOURNAL of the American Concrete Institute (*Proceedings* V. 66-75) from January 1969-December 1978 which include papers, reports, and discussions are indexed in three categories:

1. Title LATERAL LOAD EQUIVALENT FRAME
(74-32) Fred Allen, July 1977 294
2. Author ALLEN, FRED--Lateral load equivalent
frame (74-32) July 1977..... 294
3. Subject LOAD--Lateral--Flat plate structure--
Deflection--Equivalent frame
analysis (74-32) July 1977..... 294

Numbers in parentheses with each entry constitute the title number of the item. The first portion indicates the number of the *Proceedings* volume in which the topic appears and the second portion indicates the number of the paper in that volume. In the case of discussion, the number is that of the original work and may not appear in the same volume. Discussion is identified by "Disc."

The month and year indicated refer to the JOURNAL issue in which the item appeared.

Page numbers are the initial page of the paper or item indexed; numbers for *Proceedings* and JOURNAL are the same.

Material other than papers are identified by the volume and an appropriate abbreviation. The abbreviations are:

AB	Abstracts
B	Bibliography
P&P	Problems and Practices
SP	Special Publication
ST	Standardization
TF	Technical Feature

The Institute will furnish information regarding availability and prices for papers, JOURNAL issues, and *Proceedings* volumes on request.
